

The Guardians of the Cedars Party issued the following communiqué:

What is taking place on the Lebanese arena can only be described as political filth, particularly with this failed political band that has sold itself to the devil, sold its decision-making to neighboring countries and sold Lebanon for thirty silvers.

Lebanon has lost its pioneering role in the fields of finance, economy, investments, tourism and others, when it lost its historic peaceful message and replaced it with the message of war and “liberation”. This led to the shift of this role to other regional Capitals that took its place and replaced Beirut as centers of growth, progress and prosperity.

As an example, the countries of the Arab Gulf managed to take Lebanon’s role when they wised up and replaced the slogans of war and “liberation” with those of construction and development, and they succeeded in converting the desert into paradise, while Lebanon was changed from a paradise to a desert thanks to the diligence of its political class that was seduced by the culture of war, Jihad and “liberation” and made the country the only confrontation State with Israel on behalf of all the Arabs.

Which is why we believe that relying on internal solutions to the current crisis under this failed political class that has controlled the fate of the country is truly impossible. We also believe that treating the comatose Lebanese body with ordinary medicine is no longer useful, and that only a divine miracle can make Lebanon’s resurrection possible.

And since we live at a time of the Resurrection, we call on the Lebanese people to redouble their prayers and their invocations to God, so that he grants them that miracle before it is too late.

Lebanon, at your service
